Preliminary Amendment
National Stage of PCT/JP04/000049

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

## LISTING OF CLAIMS:

- 1. (original): A crosslinkable elastomer composition for plasma process comprising a crosslinkable elastomer and a carbon fluoride filler.
- 2. (original): The crosslinkable elastomer composition of Claim 1, which further comprises a silicic compound inorganic filler and/or a filler comprising a synthetic polymer having a thermally and chemically stable aromatic ring in the main chain.
- 3. (original): The crosslinkable elastomer composition of Claim 2, wherein said synthetic polymer having a thermally and chemically stable aromatic ring in the main chain is a synthetic polymer having an amide bond or an imide bond in the main chain.
- 4. (original): The crosslinkable elastomer composition of Claim 2, wherein said silicic compound inorganic filler has average particle size of at most  $0.5~\mu m$ .
- 5. (original): The crosslinkable elastomer composition of Claim 2, wherein said filler comprising a synthetic polymer having a thermally and chemically stable aromatic ring in the main chain has specific surface area of at least 0.5 m<sup>2</sup>/g.
- 6. (currently amended): The crosslinkable elastomer composition of Claim 1, 2, 3, 4 or 5, wherein said carbon fluoride filler is heat treated at 300 to 550°C in advance.
- 7. (currently amended): The crosslinkable elastomer composition of Claim 1, 2, 3, 4, 5 or 6. wherein said crosslinkable elastomer is a perfluoro elastomer.

Preliminary Amendment National Stage of PCT/JP04/000049

- 8. (currently amended): A molded article for plasma process comprising the crosslinkable elastomer composition of Claim 1, 2, 3, 4, 5, 6 or 7.
- 9. (currently amended): A sealing material for plasma process comprising the crosslinkable elastomer composition of Claim 1, 2, 3, 4, 5, 6 or 7.
